

41

**Vibe configuration, 2024**

Wool, aluminium, carbon, spring steel, conductive yarn, plastic, computing unit with wifi, motor with unbalance, driver with controller, battery, cable, cord  
123 x 74 x 82 cm

Touching the work activates a sensimotor robotic artefact, a device that makes the piece vibrate with you, transmitting an atmosphere of feeling, while you do the same.  
Washed too hot, double dried, chattering teeth.

Installation views and details from RAUW - Das Zittern der Teile at ALL -  
Angewandte Interdisciplinary Lab, Vienna, 2024
